

CHEMISTRY EXTRA CREDIT OPPORTUNITIES

Each extra credit exercise you complete is worth one point added directly to your final averaged grade. Between this extra credit and the extra-extra credit on the website, you can get a TOTAL of six (6) extra credit point in any one quarter.

Any review or overview must be submitted by the last day of the quarter to be considered for that quarter. It is preferred that you do not wait until the last moment to submit your work. You may hand the work in or you may email it to me at reports14(at)thinkchemistry(dot)com or reports14(at)thinkchemistry(dot)org.

There are all kinds of opportunities available in the Saint Louis area.

Several ongoing opportunities are listed below:

- * View an OMNIMAX presentation at the St Louis Science Center. Submit a half-page overview of the scientific principles involved in this presentation. Staple your ticket stub to the top of the page.
- * View a popular movie and submit a one page review detailing at least 5 scientific principles or 3 chemical principles involved in this movie. Discuss how the director used these principles to achieve an effect.
- * Attend a scientific lecture or workshop. Submit a half-page overview of what you learned.
- * Attend a professional meeting, such as the St Louis Section American Chemical Society or the St Louis Academy of Science. Submit a half-page overview of the topics discussed.
- * Some other specific possible ideas:
 - The Art Museum – talk about paint, medium, perspective, etc. in terms of the science involved*
 - Research WOMEN scientists and inventors*
 - Interview a woman in science in St. Louis today*

Feel free, at any time, to come up with your own idea. Please get approval from me first.

As noted in another paper, I periodically give “extra” extra credit opportunities to you to try. Most often I list these on my web page. The rules for these things are flexible and up to me.
